*The Internal Revenue Service requires all non-profit institutions to give donors a good faith estimate of the fair market value of any goods for services received for a donation. Realizing that not all businesses desire those benefits that affect charitable deductibility, Gateway to Science offers corporate members the option of receiving science center passes, the fair market value of which is \$5.00 each. Einstein on Wine tickets are valued at \$45 each, which includes a \$25 donation per ticket.
