

2011 SUMMER SCIENCE CAMPS!

LEGO® CAMPS

Learn about structures by building towers, bridges, cars, catapults and more out of legos!

LEGO® DESIGN CAMP

Learn how to plan that awesome creation you've been dreaming of, and then build it using legos! Prerequisite: Lego Camp

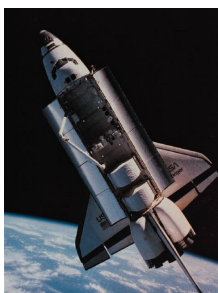

ENGINEER THAT!

Polish your hidden engineering skills with a variety of creative hands-on building projects!

SCIENCE UNPLUGGED

Find out the answers to some of your burning questions while exploring science in a whole new way!

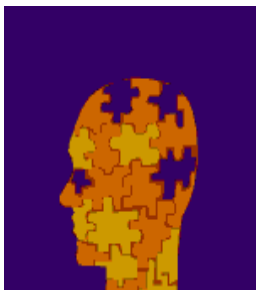

SPACE CAMP

Learn lots of cool things about astronomy, force, and motion. Build your own rocket and then launch it!

The Science of Art

Learn the science behind various types of art by participating in fun, hands-on activities. Then create art projects with the materials you've just made!

BRAINTEASERS & GAMES

Do you enjoy puzzles or finding new strategies in playing games? This camp is for you! Learn strategies behind games, and even invent and play some of your own!
