Education Wing includes NISC, Hoeven, and Koch Classrooms

The education wing in the new Gateway to Science center will be busy year-round with afterschool club meetings, STEM Adventure camps, field trip workshops, professional development sessions, and special events. The first stop in the education wing will be the Frank Koch Laboratory Classroom, named in honor and memory of Gateway to Science’s founding scientist. Frank’s family, friends and fellow Gateway to Science Board members came together to surprise Frank and his wife Kay with the classroom sponsorship in 2015. Next door will be a classroom sponsored by Senator John & Mikey Hoeven and a classroom sponsored by National Information Solutions Cooperative (NISC).
Inland Oil Sponsors Energy Exhibit

Inland Oil & Gas Corporation has made a $100,000 commitment to the Gateway to Science Capital Campaign. The company is sponsoring and helping to develop an exhibit in Transforming Energy called “Why Do We Need Energy?” Inland has provided energy services for three generations. Berk Strothman founded the company in 1967. Lynn Moser, daughter of Kay and Berk Strothman, became President in 1991. Now Lynn’s daughters, Kate Black and Twila Weis, the third generation, have joined her in the family business. In September 2019, Lynn was inducted into the North Dakota Petroleum Council Hall of Fame. Berk, Lynn and Kate have all served as president of the Landman’s Association of North Dakota (LAND). The Strothmans and LAND have also made gifts to support the campaign.

Groundbreaking Celebration

Gateway to Science broke ground for its new building project on Monday, October 7, 2019. The groundbreaking was held at the site of the new science center on Canary Avenue near the MDU Resources Community Bowl. The visionary, multi-phase project will provide a much needed hub for hands-on STEM experiences, and will stand as a legacy for generations to show North Dakota’s commitment to education and innovation.
