Build a Foam Rocket

1. Cut four slits 12 cm long 90 degrees apart.

2. Cut 12 cm strip of duct tape in half lengthwise. Place one strip on top of other.

3. Tape launcher rubber band to nose end of rocket.

4. Add tape strip around the nose to strengthen the attachment.

5. Cut out fins with notches.

6. Slide fins together.

7. Slide fins into slits.

8. Close fin slits with narrow strip of duct tape.

Ready for flight!
