### **Madison Milbrath and Kirsten Dickhut join North Dakota's Gateway to Science as STEM Educators**

**Bismarck** - North Dakota's Gateway to Science (NDGTS) welcomed Madison Milbrath and Kirsten Dickhut to the staff as STEM Educators.

Milbrath is a North Dakota native from Minot. She studied Biology and STEM Education at NDSU, earning Bachelor's and Master's degrees. Madison recently moved to Bismarck to begin her work as a STEM Educator with NDGTS.

Dickhut has been passionate about STEM since her teen years. After obtaining a Geological Engineering Degree and working in the environmental field for 20 years, she became an educator in the Bismarck public and Catholic schools.

Both are excited to join North Dakota's Gateway to Science and continue educating future scientists and engineers. The STEM Educators develop and lead activities for onsite programming as well as outreach programs delivered throughout North Dakota.

NDGTS is North Dakota's hands-on science center and is located in the Frances Leach High Prairie Arts & Science Complex, 1810 Schafer Street, Bismarck, North Dakota. In addition to an interactive exhibits gallery, they offer STEM educational outreach programs serving people of all ages, including out-of-school time clubs, camps, and workshops. North Dakota's Gateway to Science is open Monday-Thursday 12-6pm; Friday 12-5pm; and, Saturday 10am-5pm. A new science center is under construction with plans to open late 2022. Visit [www.gatewaytoscience.org](http://www.gatewaytoscience.org) for more information.
